Comment: Several items included in attachment, such as natural rubber and raw asbestos, are not produced in the DFR. In these cases, planned and actual imports are listed. In the actual production column, the production of factories other than SAC and VED is not listed separately but is included in the total figure. Amounts allocated sometimes exceed the total of production and imports. This is due to the fact that small amounts, listed as "in stock", were carried over from the previous year.)
